

LEARNMORE TECHNOLOGIES

Python Course

ABOUT LMT

Learnmore Technologies is a leading IT training institute with branches in Bangalore, including Marathahalli, BTM Layout, and Kalyan Nagar. They specialize in providing high-quality training on a wide range of technologies, including software development, cloud computing, and data science. The institute offers both classroom and online learning options, catering to beginners and professionals looking to upskill. With experienced trainers and a strong focus on practical, hands-on learning, Learnmore Technologies ensures students are job-ready. They also provide certification assistance and placement support to help learners secure roles in top companies.

TRAINERS PROFILES

Learnmore Technologies trainers are highly experienced professionals, often working in top MNCs, bringing real-world industry insights into their teaching. They have extensive knowledge of the latest IT tools, software, and technologies, ensuring students stay up-to-date with industry trends. Trainers focus on practical learning by providing hands-on projects and real-time case studies in both online and offline modes. Whether it's in a virtual or physical classroom, they engage students with interactive sessions and personalized guidance. Their teaching methods prepare students to excel in technical roles with confidence, backed by professional expertise.

CONTENTS

1 Statements

- Introduction
- 1.1 Background
- 1.2 Input/output
- 1.3 Variables
- 1.4 String basics
- 1.5 Number basics
- 1.6 Error messages
- 1.7 Comments
- 1.8 Why Python?
- 1.9 Chapter summary

2 Expressions

- Introduction
- 2.1 The Python shell
- 2.2 Type conversion
- 2.3 Mixed data types
- 2.4 Floating-point errors
- 2.5 Dividing integers
- 2.6 The math module
- 2.7 Formatting code
- 2.8 Python careers
- 2.9 Chapter summary

3 Objects

- Introduction
- 3.1 Strings revisited
- 3.2 Formatted strings
- 3.3 Variables revisited
- 3.4 List basics
- 3.5 Tuple basics
- 3.6 Chapter summary

4 Decisions

- Introduction
- 4.1 Boolean values
- 4.2 If-else statements

- 4.3 Boolean operations
- 4.4 Operator precedence
- 4.5 Chained decisions
- 4.6 Nested decisions
- 4.7 Conditional expressions
- 4.8 Chapter summary

5 Loops

- Introduction
- 5.1 While loop
- 5.2 For loop
- 5.3 Nested loops
- 5.4 Break and continue
- 5.5 Loop else
- 5.6 Chapter summary

6 Functions

- Introduction
- 6.1 Defining functions
- 6.2 Control flow
- 6.3 Variable scope
- 6.4 Parameters
- 6.5 Return values
- 6.6 Keyword arguments
- 6.7 Chapter summary

7 Modules

- Introduction
- 7.1 Module basics
- 7.2 Importing names
- 7.3 Top-level code
- 7.4 The help function
- 7.5 Finding modules
- 7.6 Chapter Summary

8 Strings

- Introduction
- 8.1 String operations
- 8.2 String slicing
- 8.3 Searching/testing strings
- 8.4 String formatting

8.5 Splitting/joining strings

8.6 Chapter summary

9 Lists

Introduction

9.1 Modifying and iterating lists

9.2 Sorting and reversing lists

9.3 Common list operations

9.4 Nested lists

9.5 List comprehensions

9.6 Chapter summary

10 Dictionaries

Introduction

10.1 Dictionary basics

10.2 Dictionary creation

10.3 Dictionary operations

10.4 Conditionals and looping in dictionaries

10.5 Nested dictionaries and dictionary comprehension

10.6 Chapter summary

11 Classes

Introduction

11.1 Object-oriented programming basics

11.2 Classes and instances

11.3 Instance methods

11.4 Overloading operators

11.5 Using modules with classes

11.6 Chapter summary

12 Recursion

Introduction

12.1 Recursion basics

12.2 Simple math recursion

12.3 Recursion with strings and lists

12.4 More math recursion

12.5 Using recursion to solve problems

12.6 Chapter summary

13 Inheritance

Introduction

13.1 Inheritance basics

13.2 Attribute access

13.3 Methods

13.4 Hierarchical inheritance

13.5 Multiple inheritance and mixin classes

13.6 Chapter Summary

14 Files

Introduction

14.1 Reading from files

14.2 Writing to files

14.3 Files in different locations and working with CSV files

14.4 Handling exceptions

14.5 Raising exceptions

14.6 Chapter summary

15 Data Science short info-

Introduction

15.1 Introduction to Data Science

15.2 NumPy

15.3 Pandas

15.4 Exploratory data analysis

15.5 Data visualization

15.6 Summary
